TALENT OPTIMIZATION FOR TEAMS AND LEADERS

Intentionally design and measure your organization to create dream teams that unlock productivity and boost retention.

THE CHALLENGE

With disengagement affecting more than 20% of the workforce, the cost of not optimizing your talent strategy can be staggering.

It's estimated that a disengaged employee can cost a company \$3,400 for every \$10,000 of their salary. Now multiply that cost by 20% of your workforce, and you can see how it adds up.

But while all CEOs have a business plan and most have a financial plan, many are lacking an intentionally-designed people plan that works in lockstep with their business strategy and allows them to achieve optimal overall results.

COMMON CHALLENGES ADDRESSED BY TALENT OPTIMIZATION:

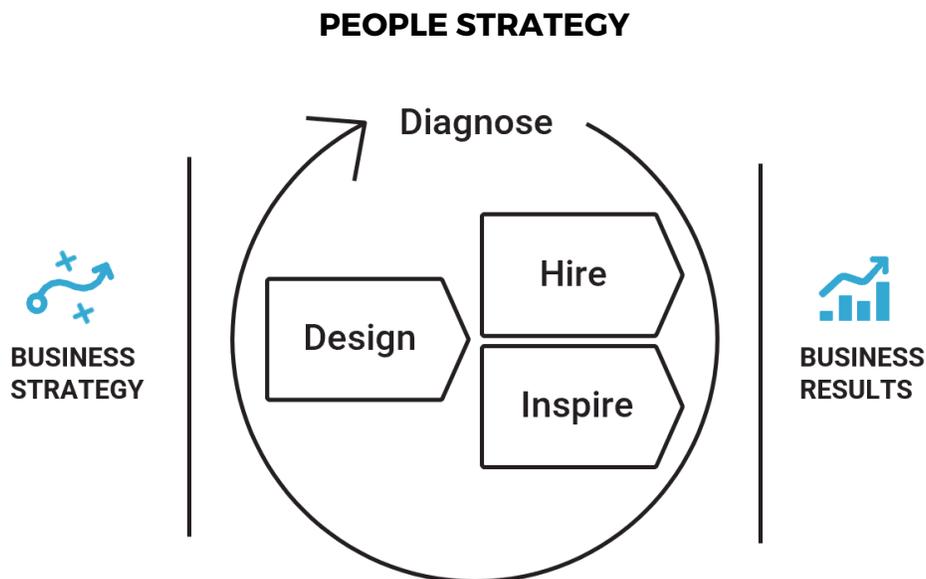

- Skills gaps
- Disengagement
- Turnover
- Bad hires
- Sales slumps
- Expansion choices
- Leader development
- Change enablement
- Globalization
- Mergers & acquisitions
- Changing market
- Growth obstacles
- Team building
- Conflict resolution
- Strategic planning
- Culture change
- Career progression
- Hiring bias & subjectivity

INTRODUCING TALENT OPTIMIZATION

Talent optimization is the missing link between business strategy and year-end results. By **aligning business and people strategies**, leaders are empowered to assemble the right teams and create environments that fire up employees to achieve tangible business results.

It allows leaders to intentionally, consistently, and strategically design cohesive teams and the supporting culture that drives business results.

THE FRAMEWORK

APTITUDES OF TALENT OPTIMIZATION

DIAGNOSE

Businesses gain valuable insights by collecting and analyzing people data to uncover the root of their challenges. These insights can then be leveraged to make strategic changes that boost performance across the organization.

DESIGN

Putting together a random assortment of people and hoping for the best is not a solid business strategy. To achieve the best outcome, an organization must leverage people data to deliberately design its approach to leadership, culture, and team dynamics.

HIRE

The ability to hire well sets the stage for future organizational success. Defining the roles an organization needs and matching the right person to the requirements increases the opportunity for success.

INSPIRE

When leaders understand their employees and employees understand each other they're equipped to minimize conflict, reduce organizational toxicity, and communicate more effectively. This removes distractions that often get in the way of results.

“What really compelled me about [PI] was the depth of the insights. [It] didn’t just tell us our scores but rather provided us with things to be mindful of when putting the insights into business practice.”
